

Experience unparalleled comfort and hygiene with a smart toilet that combines advanced technology with modern luxury

---

## Night light

Guiding you through the night with a soft, gentle glow, smart toilet lights bring comfort and peace in your quietest moments.

## Automatic Lid and Seat

effortlessly opens and closes without the need for manual contact, enhancing hygiene and convenience.

# Smart Toilet with Pump and Tank

---

your bathroom experience with our advanced Smart Toilet, designed for ultimate comfort, hygiene, and efficiency. Featuring a built-in water tank and powerful pump system, this smart toilet ensures consistent and reliable performance with every use.

**Innovative Water Tank:** The integrated water tank offers a dependable water supply, ensuring powerful and efficient flushes while minimizing water consumption.

**Precision Pump Technology:** Our smart pump regulates water pressure for optimal bidet functionality, providing a customizable and comfortable cleansing experience.

## UV STERILIZATION LAMP

---

in a smart toilet uses ultraviolet light to kill bacteria, viruses, and other harmful microorganisms in the toilet bowl. This feature ensures a higher level of cleanliness by sterilizing the surface after each use, reducing the need for frequent manual cleaning

## Foam Shield

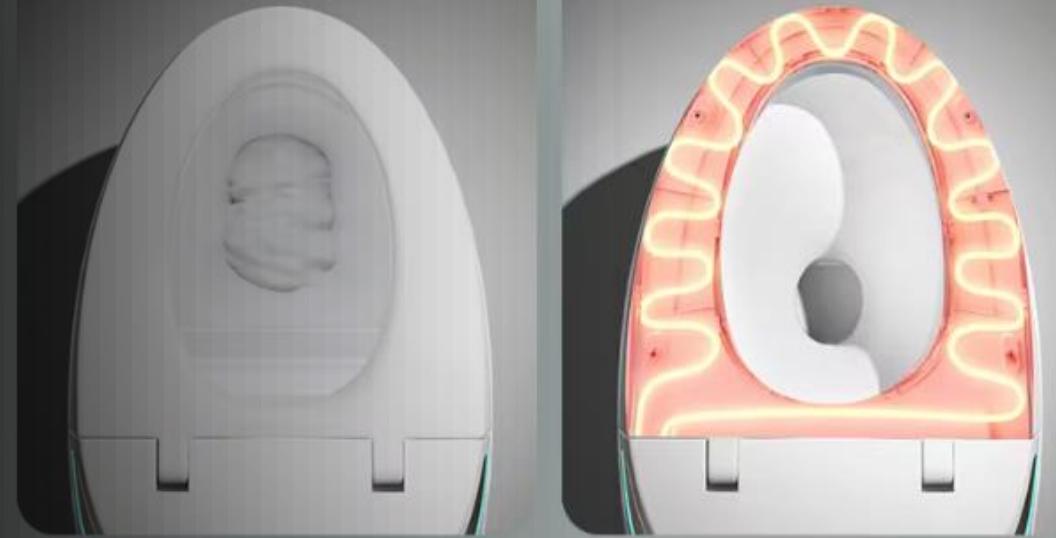

---

1. Odor Control: The foam acts as a barrier to minimize unpleasant odors from escaping the bowl.

2. Splash Prevention: It reduces splashing during use, creating a more comfortable and hygienic experience.

## Heated seat

- 1. Adjustable Temperature: control or touchscreen panel.
- 2. Energy Efficiency
- 3. Quick Heating
- 4. Consistent Comfort

## Fragrance System

---

Say Goodbye to Smelly Toilets with Our Organic Plant-Based Deodorizing Formula.

An aroma system in a smart toilet is designed to enhance the user experience by releasing pleasant fragrances to neutralize odors and create a more refreshing bathroom environment. Here's how it typically works:
